EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 1-29 and 45-50.

This application is in condition for allowance except for the presence of claims 1-29 and 45-50 to an invention non-elected without traverse. Accordingly, claims 1-29 and 45-50 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a method of fabricating a composite electrolyte by applying onto a surface of a substrate a viscous liquid composition of an inorganic cation exchange material, a silica based material, a polymer based material and a solvent-dispersant, spreading the viscous liquid to form a uniform thickness layer the substrate and evaporating the solvent to yield a composite electrolyte with an inorganic cation exchange material of between 0.1 to 99% by weight. The closest prior art to Tsai et al shows a modified clay mineral that is manufactured of a polymer/clay nanocomposite having a polymer matrix and a layered clay mineral uniformly dispersed in the polymer matrix, with the layered clay mineral being intercalated with a catalyst. This prior art does not show applying this mixture onto a

substrate, nor does it teach that the materials when mixed together is a viscous liquid composition, nor that the viscous liquid is uniformly spread onto a substrate and evaporated. In fact, the prior art of Tsai et al appears to not to admix the materials, but instead make each material, dry and grind it, to then make a subsequent material and then makes a final product material composite which does not appear to be an electrolyte, since the final material has an electrically conductivity, rather than an ionic conductivity, which is respective on an electrolyte membrane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
